# CoffeeOuch
==========

 Windows App for accident prone coffee drinkers.

You're on your way back from break with a welcoming hot cup of coffee when you trip over your ____ (coworker, child's toy, the ledge of a door or just a zombie slaughtered a few moments before you took your well earned break). While your current friends may just point and laugh at you, Coffeeâ€¦ Ouch! will be there to help you.

Contains instructions for physical burns, clothing stains and surface stains. Along with other tips and tricks of the trade from helping you save your laptop, to pranking your friends and co-workers.
